

Care of the violin

1. Only lift the violin by the neck.
2. Do NOT touch the bow hair.
3. Use rosin on your bow hair to help make the strings sound but you don't need to use it every time you play.
4. Use the fine tuners, near the bridge, to tune the violin.
5. Wipe the violin down with a soft duster after practice and put it back in its case.
6. Keep the instrument in a safe place away from heat sources (e.g radiators)
7. If any loss, damage or breakage occurs please contact your teacher by leaving a message with Shropshire Music Service on 01743874145
